

You too can do that with Prevento!

Filling: Approx. 6 Liters.

Used: Approx. 1 Liter.

Used: Approx. 2 Liter.

Used: Approx. 4 Liter.

Impregnation

Used: Approx. 5 Liter (Impregnation).

Used: Approx. 6 Liter (Impregnation).

The burning materials has been impregnated against reignition during extinguishing with Prevento.

How much water, foam or powder
would you have needed?

Quotation

The firemen guessed a needed water volume of about 300 liters to extinguish the fire. I needed only 4 liters to extinguish and 2 liters to impregnate.
